

Case Study: OPCO

Contract: Diamond Core Drilling for a prestigious residential development in Pembrokeshire, South Wales

The Situation

OPCO required hundreds of diamond-drilled holes to be cored through reinforced concrete for services and ventilation ducts.

The Solution

Trueform keep in stock numerous diamond drilling rigs and various core bits and have a team of specialists to carry out this operation.

The Benefits

Trueform provide a reactive diamond core drilling service that can be onsite within hours of the order being placed.

"This was an extremely rushed and pressurised job, Trueform had men and equipment on-site same day"

Jonathan Williams, Project QS
