

Case Study: Besix-Kier

Contract: Precast Reinforced Concrete Contract in Pembrokeshire, South Wales

The Situation

Besix-Kier required a specialist precast reinforced concrete contractor to manufacture all of the components for the new jetty at SHLNG (South Hook Liquid Natural Gas) terminal.

The Solution

Trueform provided all of the necessary manufacturing skills, formwork and falsework to produce all of the precast components for the project.

The Benefits

Trueform's ability to work to an extremely tight timescale ensured that all components were produced on time.

"Trueform came up with innovative ideas for the formwork and falsework systems which ensured that this project was delivered on time and to the highest quality"

Phillip Miles, Project Manager
